DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3, 13, and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ohba et al. (U.S. patent # 4,658, 155) in combination with Harnden, Jr. et al. (U.S. patent # 4,626,698).

Ohba et al. disclose the claimed invention a circuit arrangement for an electric appliance (figure 1), including piezo switch (figure 1, item PS and column 3, line 1-4,). Harnden, Jr. et al. does not disclose the technique for a locking a switch for continues supply power. Ohba et al. teaches the utilization of the technique for a switching of switch for longer time (column 16, line 45-65). It would have been obvious one having an ordinary skill in the art at the time the invention was made to modify Harnden, Jr. et al.'s apparatus by utilizing the technique taught by Ohba et al. for the purpose of providing power supply which reduce the quiescent current consumption.

Allowable Subject Matter

3. Claims 4-12,14-15 and 17 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
